Summer 2011

Laugh a little, learn a little & take a break from the daily grind

The Ultimate Team: Maple-Leaf Construction and Butler Buildings

Since our founding in 1964, Maple-Leaf Construction has always offered a pre-engineered building option to our clients for their construction needs. Working with Butler Manufacturing Company, the foremost manufacturer of pre-engineered building systems in the world, we provide our customers with the best building products and the finest support network for their new or expanded facility.

As an authorized Butler Builder, Maple-Leaf has had to meet rigid qualifications, including a demonstrated capability in our construction field personnel and experienced management, as well as rigid thresholds for financial strength. With these credentials, an owner is guaranteed that the project will meet or exceed their chosen criteria throughout the construction process.

Ready to build your new facility? You'll want the most efficient design and construction without wasting a dollar or a day. No team meets these requirements better than Maple-Leaf Construction and Butler Building Systems.

From office buildings to maintenance facilities, and even concrete plants, the design flexibility in a Butler Building System is virtually limitless.

At 16,000 square feet, the project for Options Publishing in Merrimack provided ample office area, as well as high bay storage for the growing firm.

The 10,800-square-foot interior of Dave's Septic Service maintenance facility in Manchester, N.H.

Recently completed, the 10,800-square-foot Reeds Ferry Shed project even included building overhangs, canopy storage areas and clear span manufacturing space.

You'll save time and money.

Because the structural frame roof and wall systems are computer designed and computer detailed to meet your exact needs and local code requirements, you'll save both time and money with a proven Butler Building System.

Maple-Leaf's knowledgeable professionals can manage your project with the skills needed to complete it on time—exactly the way you want it.

And when you choose our team, you are assured of superior quality, organized professionalism, and one of the most versatile building systems available.

You get a building that performs.

Every component of a Butler Building System has been tested by a Butler research specialist and proven in use on tens of thousands of buildings around the world.

For example, our MR-24 double lock standing roof system is the industry's most specified. Millions of square feet can be found throughout New England and over a billion in the United States. Guaranteed weather tight for up to 20 years, the MR-24 roof system can save roof maintenance costs and headaches.

Outside: Your choice.

The appearance of your new building is a critical factor. Tell us what you would like and we can build it!
